Facebook: the permissions: allows applications for network applications sockets. allows open to access information on networks. Evaluations and comments Classification: 3.2 / 5 Based on 33K + reviews (\*) You need 3 to correct this game. It's super-buggy and you don't get to things to unlock. Also increase the jump makes it more fun. 2 to ok first of all from bug fix you need coin bug fix decrease fox bug is enough back to old graphics needs more ways to get more map coins and more charter men too and your ways should make ways How to hide in search Infection etc oh, and more sound effects as if you agree 1 graphics a need for an update, the selection skins will not register, the map is small, the killers have too much advantage over survivors, the survivors do not have Objectives or goals, the controls are quite whack, and there is only one server. 2 to its fun game with a lot of potential, but "murderee" customization is not displayed up to The dead version of the player? I also found this strange bug where the points do not appear and return like 0 on the update screen. Having nicknames would be nice in chat. 1 ã, it was better before the updates. I lost the game so I downloaded again to find out that it has changed and not for the best. Disappointing. Playing out of the map was a big part of the fun. Girls cannot skip higher they used for both. I miss missing Old version. Bring it back! 2 Å ¢ ~ ... and some options and a goal. The 1st sensitivity is too high 2 Å ° The buttons are so small (like your pà ° ~,) 3a the voices are repeated and simply annoying. I can see this very fun game but needs some improvement. 3 Ã ¢ ~ ... the game is fantastic and everything except you to update the game. You have to stop the speed limit to go a lot. There is a way for fast people. And very quickly when they are using the nurse with a broken face. You should make the graphics a little better. And you should do when people are waiting for them more coins. And you should make a room for people to escape from the "dead". This is all that I have to say. 4 Å ¢ ~ ... I was usually playing this all the time you loved (yet) I usually play on my Kindle fire, but now I can't download it at all on my phone or my Kindle 3 Å ¢ ~ ... I do 3 stars because everything you do is running and not being murdered and take the chest I mean that wut is the point? Here are the things that must be added 1: when you get all the chest and then you can run away 2: adjust this if it's a technical problem first of all I can't change the survivor Iv'e has tried but it's still 3: Please make murder a little less money to buy them. 4 Å ¢ ~ ... the camera is not the best, the chest coins are sparing really far away and some remain blocked in the furniture. Please lower costs for different killers, they are too expensive. The only map is a bit boring, and you should add a countdown that will tell you when you will transform you. Furthermore, please do it so that the killers can collect and open the chest. The child is from another horror game, "hit", so I think you should at least give credit to the original. Apart from that's a good game and really fun! 1 Å ¢ ~ ... I remember playing this game years ago, somehow the graphics is worse and the interface is clunky and frustrating. Sometimes when you run, the pan camera and enlarges it makes you stop moving and it's almost impossible to kill someone on your first meeting with them because when you hit things, stop moving and nothing happens to the victim so they run away. Even the update menu for murderers does not work, says you don't have coins even if you do it, the murder selection doesn't even work. 5 Å ¢ ~ ... This game was amazing and indicating in 2016. But now it's full of hackers, killers who don't kill and only protect. And many medium toxic people. Now it's just hack and protect online. Even some of the problems are annoying. The only way to save this game is to prohibit all the mods and hacks and correct some problems. I still like this game so, but not as much as I did 3 years ago. Please adjust the game and do something about all these annoying exploiters; -; 3 Ã ¢ ~ ... I really like this game, but what I hate is like we have no usernanes, and for me we don't constantly camp in a strange language and give me an option that says about yes or not! And if I click NO is not kicked, and if I click yes, I am sent to the menu. And I don't see any button to stop! 1 Å, ~ ... Waste app. I would not recommend it. The controls and graphics are horrible! The game seems to deteriorate from every update.
